

Globe Power Mobile AC units are heavy-duty, portable power banks designed for industrial use. They support multiple input sources including solar, grid, genset and battery, making them a flexible solution for delivering reliable AC power in the field. Installation is fast, and the result is a long-term power setup with minimal maintenance and a 10-year battery life, offering strong return on investment.

Built with premium components, units can be monitored remotely, allowing you to track power usage and battery health in real time.
